The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rogers et al. in view of WO/95/05184 (WO '184).

Rogers et al teach the quaternary ammonium adduct of polyepichlorohydrin (title, column 1 lines 12-25).

WO '184 teaches the removal of phosphate with phosphate binding polymers by oral administration (abstract). Quaternary amines are disclosed (page 4 line s8-14).

It would have been obvious to one of ordinary skill to use the polymer of Rogers et al to achieve the beneficial effect of phosphate removal in view of the teaching of WO '184 that polymers possessing quaternary amine moieties are effective for such removal.

As to the time of administration and amount of polymer administered, an optimum suitable time and amount can be obtained by routine experimentation.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 3-5, "reduction of" is vague; is unclear as to whether the term is used for the chemical process of reduction or whether applicants intend a reduction in the amount of what follows.

In claim 1 "a physiological pH" is indefinite; do applicants intend "at"? See claim 5.

Claim 5 provides for the use of a water soluble polyether glycol polymer, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 5 is also rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

No claims allowed.
